Microprojectors

The JV10 MICRO PROJECTOR
www.microprojectors.ie

This is a **mini** handheld projector.

It weighs **190grammes** as opposed to most projectors, which weigh around 5 kg's.

This makes it **very portable**. Its fits in your pocket.

No need for a laptop and a heavy projector.

This product is a micro projector with MP4 player function that can connect with mobiles and **iPhone MP4 iPod PSP PDA DVD Nintendo Wii**

It can project a sharp & crisp image from 5"-30" & up to 80" diagonal in a dark environment screen at 640x480 resolution from a distance of just over 5 feet. It is ideal for business presentations or watching movies.

JV10 Microprojectors

It has a **built in memory**, uses SD Card & is an MP4 Player so you can download movies and watch them on any white surface like a wall or projector screen. It works anywhere you are.

It will support native display of a variety of different media files including **MP4 AVI files MP3 audio and JPEG images**

It can be used to show **pictures or photographs**.

Plug the **mini USB** into your PC or Laptop and simply copy and paste the files into the Micro Projector.

Add a set of **speakers** to the 3.5 jack & you have stereo sound.

It uses **LED**, which is the latest technology.

Lithium Rechargeable Battery & DC Power

Bulb life of 30,000 hours versus 2,000 hours on a conventional projector.
